

## COMMISSIONER KENNEDY PROPOSED AMENDMENT NO. 5

DATE PREPARED: February 7, 2022

COMPANY: Arizona Corporation Commission – Resource Planning AGENDA ITEM NO. 26

DOCKET NO. E-00000V-19-0034

OPEN MEETING DATE: February 8, 2022

---

**Purpose:** As a result of the Commission's recent vote on Docket No. RU-00000A-18-0284 (Energy Rules), this amendment recognizes the current Energy Efficiency Standard does not set additional efficiency levels beyond the year 2020.

In 2010 the Commission adopted a 22% by 2020 Energy Efficiency Standard on a bipartisan and unanimous vote. Considered nation-leading at the time, the results exceeded expectations, saving more than \$1.4 billion, reducing demand equivalent to 14 gas combustion turbines, and saving 15 billion gallons of water according to annual utility DSM reports.

This amendment takes the next step forward, requiring Arizona Public Service Company to reach incrementally higher on energy efficiency than current company goals. This amendment adopts optimum energy efficiency levels, recommended by SWEEP.

**INSERT New Ordering Paragraph:**

"IT IS FURTHER ORDERED that Arizona Public Service Company shall achieve at least 37% cumulative annual energy savings by 2030 from a broad portfolio of energy efficiency programs and measures and using a 2010 baseline (consistent with savings equivalent to 15% of retail sales over the next ten years, averaging 1.5% savings as a percent of the prior year's retail sales annually)."
